

Motorola Video Baby Monitoring Skype Phone System on Android 2.3

Motorola essentially invented the police radio and military walkie-talkie industries... now they take on a real challenge: You and your baby. Motorola took the challenge seriously with the game-changing WBP 2000 baby monitor—a fully functioning Android phone preloaded with Skype and three baby apps. Monitor your little one from the next room, or the next continent, with up to four auto-rotating and tilting cameras via smartphone, tablet or computer! Clarity for two-way audio communication is excellent with the included stereo speakers and high sensitivity mike. Even touch screen Wi-Fi connectivity is included. It's security at your fingertips.
